

nAxis software provides control up to the desired number of axes.

Features:

- Ability to monitor real-time critical data
- Ability to create and save recipes
- Ability to view recipe values and actual values on the same screen during tests
- Ability to observe graphs during tests
- Ability to perform curve, sine, linear, and block tests
- Ability to create tests based on position or force
- Reporting with pre-created draft reports

n Control up to n axes!
